CASE STUDIES

CI/CD through Jenkins – We created EC2 instances for the Jenkins and tomcat. We configured both tomcat and Jenkins.

Using the git repository we fetched the html file and deployed it in Jenkins server using IPV4 address.

- Ansible configurations in AWS – We have created two instances for server and clients . We connected both ansible server and client and worked on it.
- CI/CD through Containers (Docker) – Here we create an instance for docker and install the docker and then deploy the container using Jenkins.
